

MISF FARM

Linneus, Mo.

About us

We are a family-owned farming operation, and our pork and beef are raised with the same quality and standards. Our livestock are born and raised on our farm and are fed grass and grain products that we grow ourselves. We purchase natural grain protein products and a mineral-vitamin package to add to the calf feed ration as well as provide salt for the cow herd. We have a closed cow herd; the only external animals brought in are breeding bulls. We do not use growth hormones. We know you will enjoy the taste and flavor of our fresh, homegrown meat!
